Custom Glass Corporation is a leading fabricator of bent and flat transportation glass products including; laminated, tempered and chemically strengthened glass. We provide the highest quality products (ISO 9001:2000 Certified) and work closely with our customers to ensure all applicable specifications are surpassed. For over 20 years we have had the unique capabilities to provide economical, high-volume products and custom engineered solutions. Our products are tested and certified to a variety of standard specifications including: American National Standards Institute (ANSI) Standard Z26.1 [AS-1,2,3]; Federal Railroad Administration (FRA) Standard 49 Part 223 [Type I & II]; Department of Transportation (DOT); Society of Automotive Engineers (SAE J673 & SAE J674) and various Military Specifications (MIL-Specs). We also certify our products to customer specific specifications and requirements.

Rail Glass

Custom Glass Corporation manufactures high quality glass for both light and heavy rail systems including: LRVs, People Movers, Subways and Trains. Our glass is used in such areas as passenger compartments, operator security, windshields and cab partitions. Our Engineers will work directly with you to ensure all specifications and tolerances are exceeded.

Our ISO 9001:2000 Certification assures you will receive the highest product quality and superior customer satisfaction. Custom designed crating and packaging protects your glass to arrive intact, whether shipped domestic or international. Give us a call and see why our extensive satisfied customer list includes most major rail car producers throughout the globe.
